FRUIT TRUE TO NAME

PROPAGATED BY
MALONEY BROS. & WELLS CO.

Dansville's Pioneer Wholesale Nurseries
DANSVILLE, N. Y.

FALL 1913

We Employ No Agents

Buying Direct from Us through our Catalogue You Save the Middleman's Profit.

In presenting this, our annual Wholesale Catalogue, to our patrons and friends we desire to extend our thanks and appreciation for your most liberal patronage in the past, and assure you of our appreciation for your continued patronage which we hope to merit by serving you in our usual prompt and careful painstaking manner.

We want to thank the hundreds and thousands of people for the many fine letters of testimonials about our trees, the manner of packing and so forth. While we are the Pioneer Wholesale Nurserymen of Dansville it is due to your appreciation of good stock and your co-operation in recommending our trees to your neighbors for all of which we are very grateful.

In 1882 we started to grow nursery stock for the planter and sell through the medium of a catalogue; that year we set out 3,000 seedlings. In the spring of 1912 we planted 1,700,000 seedlings, a most phenomenal growth indeed, simply due to the quality of our trees and the prices of same.

Mr. Maloney's Talk to Customers and Friends. Dear Friends: This is our 29th year growing trees for you. Each year we have striven to curtail expenses so as to sell good first-class trees at a minimum price. We know positively no one can sell you first-class stock for less money.

Our prices are such that every man or woman who wishes to plant, can do so without making any sacrifice, for a few hundred trees cost a trifling sum, and when fruiting, will bring greater results than any other way you can invest that amount of money.

Our trees have done remarkably well this season, and since we cannot go to see you, we want those of you who can to come and visit our nurseries, it will be worth while.

Dear friends, if your order comes to us, you will be treated just as we would want to be treated were we buying of you.

Last spring freight service was frightfully poor. We know what it means to have trees delayed enroute, so we kept constantly tracing shipments until they arrived at destination, therefore, only very few shipments were delayed. Prompt delivery means considerable to the planter.

We will appreciate your patronage, and you may rely you will be supplied with guaranteed true to name and free from disease trees and plants.

Fall Planting is advantageous, for the autumn rains settle the earth around the roots so that they are well established in their new home and ready to start growing with the first warm days of spring, consequently you will find fall set trees will make a decidedly better growth and percentage of loss very small.

Shipping Season begins about October 10th and continues until cold weather.

References: We want you to write to any of the following as to our reliability or responsibility:

Citizens Bank, Dansville, N. Y.

Merchants and Farmers' National Bank, Dansville, N. Y.

R. G. Dun & Bradstreet Mercantile Agencies.

Parties whose testimonials appear in our catalogue or any business house in Dansville.

We want to serve you because we give personal attention to each and every order, and you may depend that you will be well served for we guarantee satisfaction or refund your money. We know there is no better stock in the United States than what we have to offer this season. We know our trees are right and we want you to know it and the only way we can convince you is to send us your order. We must have treated people right or we could not have made the rapid growth we have.

Confidence of our customers has been won by sending exactly what they order, true to name and up-to-grade trees and plants. To our patrons our trees need no introduction; to those unacquainted we can only say a trial order will prove their value.

Our Trees are grown at an elevation of 1500 ft. They are hardy, healthy and thrifty, propagated from bearing orchards.

We guarantee our trees to be free from scale and disease.

We guarantee with our superior packing methods they will arrive in good condition.

We guarantee our trees to be true to name: first, because they are, as mentioned above, budded from selected bearing trees; second, our Mr. A. E. Maloney puts every scion for budding and giving his personal attention to this work, we feel that if you can get trees true to name anywhere in the country it is from Maloney Bros. & Wells Co. While we exercise the greatest care to have our varieties genuine we agree to replace on proper proof all that may prove untrue to name and it is hereby mutually agreed that our replacing or offering to replace shall operate as a liquidation of all damages.

Discounts: On all cash orders received before October 15th, we will allow a 5% discount. After October 15th, a 2% discount. No discount allowed on any but cash orders.

Rates: We allow hundred rates on lots of fifty or more. It does not matter how the number is made up; it may consist of such as 25 Pear, 15 Apple, 20 Cherry.

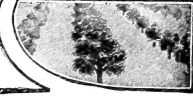

Terms: Cash with order except in large orders when satisfactory reference is given and then the order must be accompanied by one-fourth cash

How Best to Remit

Remit by Bank Draft, Express Money Order, Post Office Money Order or Registered Letter. We will ship trees and plants C. O. D. providing 25% of your order is sent in cash. If the order goes by express you pay the balance to your express agent upon arrival. If it goes by freight you pay the balance at your bank, where you will also find freight bill and order on your freight agent to deliver shipment to you.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

Freight and Express Rates

Don't let the Nursery Agent tell you that the freight on your trees will cost as much as the difference between his price and ours. It is absurd. The rate is between 20c and 40c per 100 lbs. west of the Atlantic and east of the Mississippi. First class trees will average 1 lb. each. At the maximum 40c per 100 lbs., it simply means you are paying less than one-half cent per tree for freight. Tell this to the Nursery Agent and see how he likes it. If he disputes these figures, call up your nearest R. R. Agent.

The Express rates you will also find much lower than you anticipate, as the Express Companies now carry trees and plants to any part of the country at a reduction of 20 per cent from regular merchandise rates.

Boxing and Packing Free

We box and pack all shipments without charge. All orders are put up in boxes or bales, lined with heavy paper to guard against stock drying out; the trees and plants are packed in moist excelsior and straw.

STATE OF NEW YORK
DEPARTMENT OF AGRICULTURE
Certificate of Inspection of Nursery Stock

This is to Certify that the stock in the nursery of Maloney Bros. & Wells Co., of Dansville, County of Livingston, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law and it was found to be apparently free from contagious or infectious disease or diseases, or the San Jose Scale or other dangerously injurious insect pest or pests. This certificate expires September 1st, 1914. Dated, Albany, N. Y., September 3, 1913.

CALVIN J. HUSON, Commissioner of Agriculture.

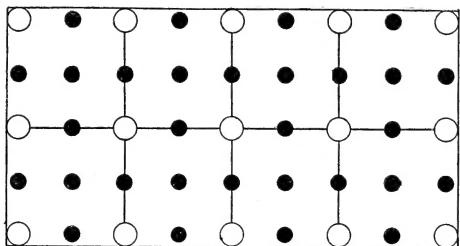

No. 1089.

Number of Trees or Plants on an Acre

3 feet each way 4,840	8 feet each way 680	16 feet each way 170	30 feet each way 48
4 " " " 2,723	10 " " " 430	18 " " " 135	35 " " " 40
5 " " " 1,742	12 " " " 305	20 " " " 110	40 " " " 28
6 " " " 1,210	15 " " " 194	25 " " " 70	

Suitable Distances for Planting

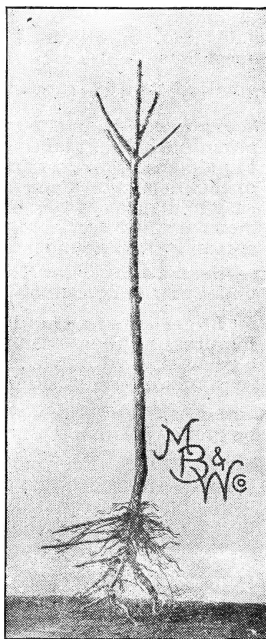

Apples, Standard, 30 to 40 feet	Cherries, Sour, 15 to 18 feet	Raspberries, 3 to 4 feet
Apples, Dwarf, 8 to 10 feet	Plums, 16 to 20 feet	Blackberries, 5 to 7 feet
Pears, Standard, 18 to 20 feet	Quinces, 10 to 12 feet	Strawberries, 1½ by 1½ feet
Pears, Dwarf, 10 feet	Grapes, 8 to 10 feet	Asparagus, in beds, 1 by 1½ feet
Peaches & Apricots, 16 to 18 feet	Currants, 3 to 4 feet	Asparagus, in field, 1 by 3 feet
Cherries, Sweet, 18 to 20 feet	Gooseberries, 3 to 4 feet	

system you can plant 28 standards and 82 fillers per acre. The standard varieties will not require the full space until the 18th to 20th year, consequently you can see that fillers are a very profitable investment.

Way to Lay Out an Apple Orchard

There are different ways to lay out orchards. The plan shown here is one that is adopted by most planters. The open circle represents the Standard varieties, 40 ft. each way and the dots, fillers, 20 ft. each way. Under this

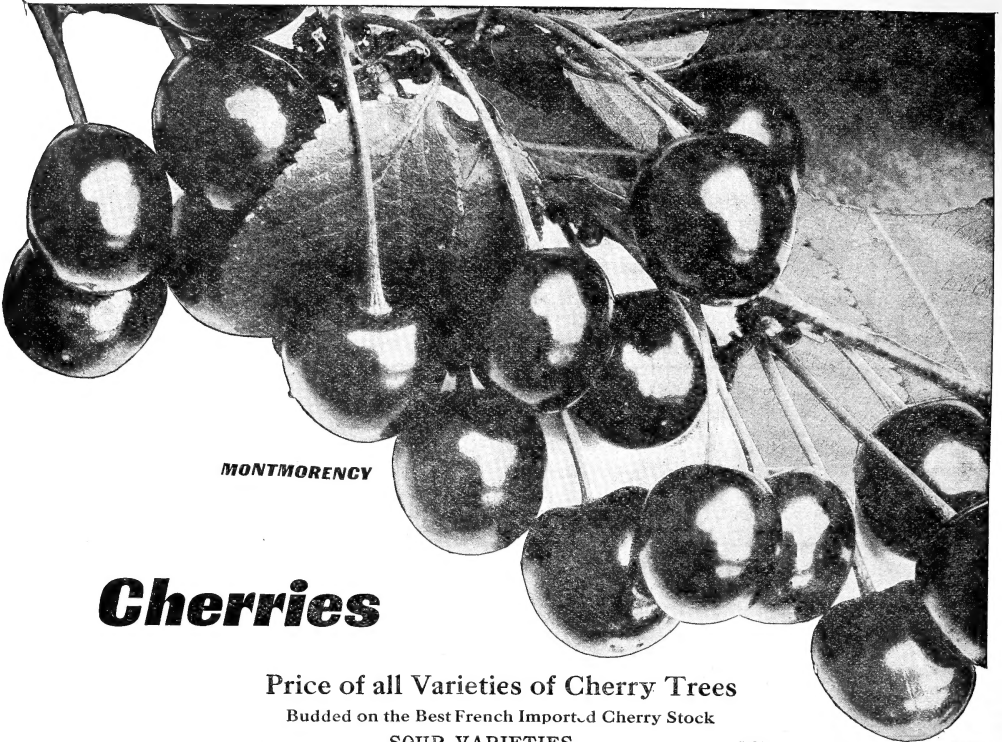

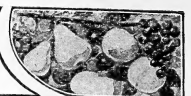

Correct Way to Prune Trees for Planting

Transplanting Directions

Preparing the Soil: First of all select a good field of rich soil. Should it be a meadow that you desire to plant, be sure and plow it during late fall so that the sod will decay and thereby furnish a certain nourishment that is very essential to the success of the trees. Clover sod will give best results.

Pruning the Tree is a matter of great consequence. The illustration here shows the correct way to trim trees for planting, do not be afraid that you are pruning too severely for you are not; this is the proper way for best results.

Planting: Make the holes large enough to admit the roots without cramping and deep enough to bring the tree to its natural depth. Always use the surface soil to cover the roots. When the hole is half full, tread firmly and then fill the hole and tread again. If you tramp the earth firmly about the roots you will not lose one tree out of every five hundred.

We will allow a 5% discount on all cash orders received before Oct. 15th, and 2% discount after that date.

Cherry growing is one phase of orcharding to which Mr. Maloney wishes to call your personal attention. That planting of cherry trees in the past has been neglected, is a fact. There is as big a demand as ever for cherry fruit—the supply does not begin to satisfy more than one-half of the demand. Canneries are being started wherever there are good cherry orchards. It is easy to dispose of your fruit, and it is one of the most profitable fruits under cultivation. Enormous profits are being realized from young orchards, for they come into bearing at an early age and yield abundantly.

Requires Least Attention of all Fruits, because it has been demonstrated beyond question of doubt that scale cannot live on cherry.

Our Cherries are Equipped with a most beautiful fibrous root system due, principally, to our top dressing them with a fine grade of fertilizer when buds were dormant. Cherry growing is a specialty with us, for we have made it a study for years and the trees we have to offer this season, we firmly believe have attained the highest grade of perfection.

Where to Plant—on any kind of land, other than wet. They will thrive beautifully on a sandy or gravelly soil.

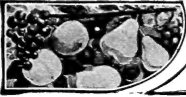

How to Plant. For your information cherry roots must not be given much sun or wind exposure—either are just as harmful as a heavy frost. You would not think of leaving them out over night uncovered. It is just exactly as necessary to protect them from sun and wind. The proper way is to keep the trees covered with a blanket or canvas while planting.

Schenectady, N. Y., Apr. 29, 1912

MALONEY BROS. & WELLS CO.,

Gentlemen: The stock ordered arrived in fine condition. Very much pleased with the quality of goods and must give you credit for shipping goods in such first class manner. Everything arrived in good condition.

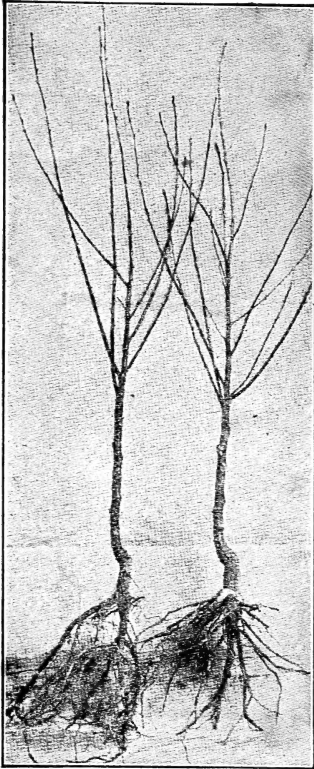

Very respectfully,
Horace J. Trego

DANVILLE'S PIONEER WHOLESALE NURSERIES

Sour Cherries

Two of Our Extra Size Sour Cherry Trees. Note Superior Root System.

Montmorency Hardy Cherry. A beautiful, large, red cherry; much larger and firmer than Early Richmond, and fully ten days later in ripening. Being extraordinarily prolific and very hardy, it can be recommended as a variety of great value. Valuable for canning and preserving. A patron writes that six years ago he planted fifty Montmorency cherry trees from which he has just harvested \$150 worth of fruit. One acre of Montmorency cherries, owned by a neighbor, has returned an average annuity of over \$600 for the last ten years. This cherry is in great favor wherever cherries are grown. With such a heavy demand for this variety, we would suggest that you order early. Last of June.

Large English Morello Cherry. Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes. August.

Ostheim. A hardy Cherry from Russia. It has been tested in the severest winters of Minnesota, and has been found perfectly hardy. Fruit large. July 15th.

Dyehouse. A hardy and valuable cherry. The earliest cherry of fine quality. Often bears at two years old, and has the appearance of being covered with a purple cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known. For tarts, pies, and especially for canning, it has no superiors among cherries. Early June.

Wrapp. Much like English Morello. More productive and excels in size, yield and quality. One of the hardiest Cherries and has produced annual crops at the northernmost limit of Cherry culture. Aug.

Olivet. A new Duke of French origin. Unlike most others of this class, it is said to be very early and to ripen over a long period. Fruit very large. June.

May Duke. Large, red; juicy and rich; an old, excellent variety; vigorous, productive. June 15.

Early Richmond. This is one of the most valuable and popular cherries and is unsurpassed for cooking purposes. This hardy cherry fruits on young trees soon after planting. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head exceedingly productive. Fruit is medium size, round and dark red. The flesh tender, juicy, and sub-acid. Ripens in June.

Sweet Cherries

Windsor. A splendid, large, liver-colored Cherry that hangs a long time and rots but little. The flesh is remarkably firm and good, the tree very hardy and fruitful. Exceedingly valuable for late market and home use. July.

Yellow Spanish. Large, pale yellow, with red cheeks; firm, juicy and excellent, one of the best light-colored Cherries; vigorous and productive. Last of June.

Governor Wood. One of the best cherries; very large, light yellow, marbled with red; juicy, rich and delicious; tree healthy and a great bearer; hangs well on the tree; vigorous. Last of June.

Lambert. A fine sweet variety originating in Oregon, and one of the largest of all Cherries, dark purple red, turning almost jet black when ripe. Flesh, firm, rich, juicy, tree rugged, strong grower and an enormous bearer. The growing of the sweet Cherry is a great industry only fairly well begun. There is an enormous market for the fresh fruit and when canned or preserved the markets of the world are open to the producer. Late July.

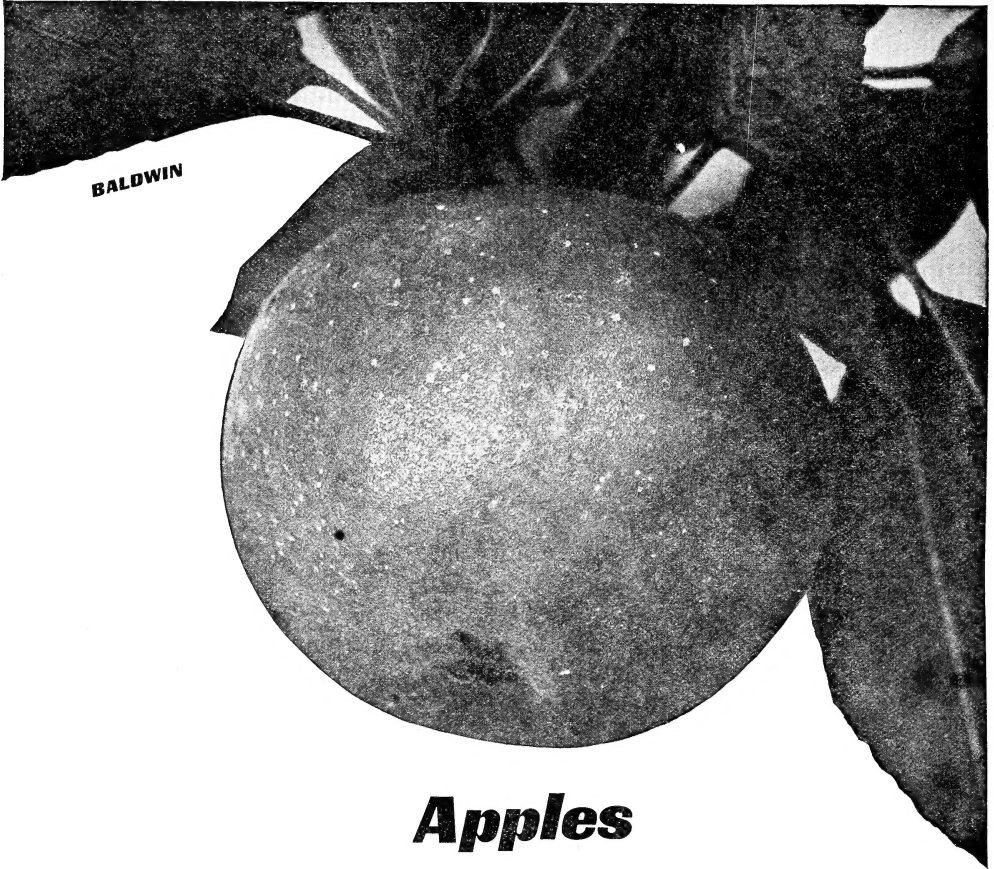

Schmidt's Biggarreau. The fruit is of very

large size, of a deep mahogany color. The flesh is dark, tender, very juicy, with a fine rich flavor. Fruit grows in clusters. It is an excellent shipper and brings good money on the market. July.

Bing. This valuable new black cherry succeeds everywhere. Tree very thrifty and upright grower, very hardy and productive, flesh very solid, flavor of the highest quality, a fine shipping and market variety. It is one of the most delicious sweet cherries. This valuable cherry should be followed by Lambert, which is later in ripening. Both are grand cherries. July.

Napoleon. Tree medium size, erect with roundish head, fruit borne generally in twos, very large oblong cordate, light lemon yellow with red cheeks in the sun. Flesh very hard, brittle, colorless, reddish at the stone. Good, excellent bearer. Ripe about June 20th.

Black Tartarian. This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Apples

Price of all Varieties of Apple Trees

Budded on Whole Roots of Imported French Seedlings

					EACH	TEN	HUNDRED

We will allow a 5% discount on all cash orders received before Oct. 15th, and 2% discount after that date.

Have You Started an Apple Orchard? If not, we want you to ask yourself why. Observe what your neighbor is reaping from the orchard set a few years ago. Remember, we are all advancing in years and each and every one trying to arrange our business affairs so that in our old days, we will have sufficient to care for our necessities.

Apple Orchard a Safe Investment. Statistics show that there is no better investment than in an orchard of the **King of fruits, the apple**, for, after the fifth or sixth year, it requires but little attention and you have an annual income that insures you an easy living for the remainder of your days.

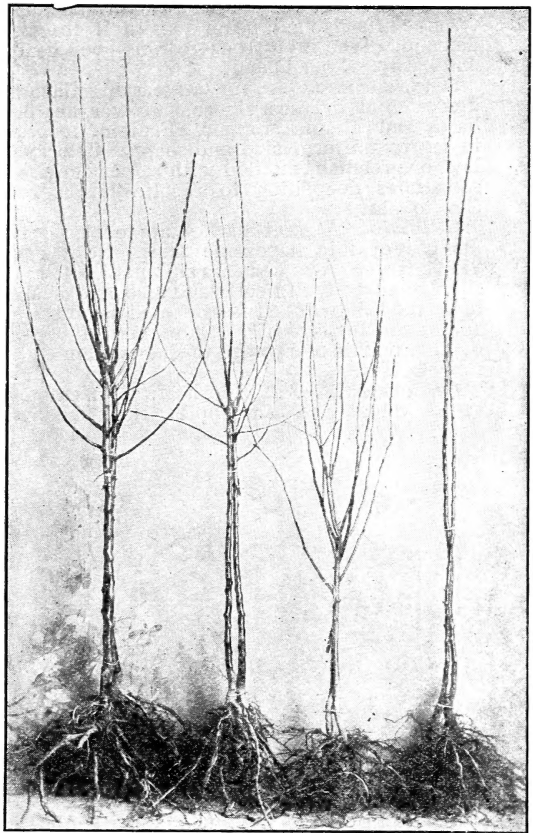

Soil and Climatic Conditions. Apple trees will do well on most any kind of soil, and under the most severe climatic conditions. However, your success depends on the care given, cultivation and spraying at the proper time being most essential.

Selection of Varieties. By judicious selection of varieties a constant succession can be obtained so that you will have apples continuously throughout the entire year. "Nothing more healthful in the home than the apple."

Why Are Planters More Successful with Maloney Quality Trees? Because we aim from the very beginning to give our patrons the most that can be had for the money. Too many Nurserymen economize by propagating on Western grown seedlings. No Nurseryman can conscientiously do this for he well knows that Western seedlings are more or less troubled with that harmful crown and root gall. We eliminate this feature by importing our seedlings from France. Any of your Inspectors will tell you that trees so propagated are longer lived and will net you greater returns. It is not so surprising after all that **Maloney Quality Trees** are being planted by thousands in every state in the Union east of the Rockies. Following is the list we have to offer this season.

DANVILLE'S PIONEER WHOLESALE NURSERIES

Two Year Apple Buds. One Year Bud
5-7 ft. 4½-6 ft. 4-5 ft. 3 ft. & up.

Summer Varieties of Apples

Early Harvest. Medium to large size; pale yellow; tender, with a mild, fine flavor. Tree an erect grower and a good bearer; excellent for orchard and garden, one of the first to ripen. Middle to end of August.

Yellow Transparent. Medium size, roundish, oblate, slightly conical; skin pale yellow when fully matured; flesh tender, juicy, sprightly, sub-acid; good. August.

Astrachan Red. Large, roundish, nearly covered with deep crimson overspread with a thick bloom; juicy, rich, beautiful, good bearer. August.

Fanny. Large, deep rich crimson, tender, juicy, pleasant. Tree vigorous and very productive. August.

Golden Sweet. Large, pale yellow, tree a good grower and very productive. August to September.

William's Favorite. A bright red apple of mild agreeable flavor. August to September.

Autumn Varieties of Apples

Duchess of Oldenburg. A large, beautiful Russian apple; roundish; streaked red and yellow; tender juicy, pleasant; a kitchen apple of best quality. Tree a vigorous, fine grower, and an abundant bearer. The hardiest fall apple. We find Duchess the most valuable commercial variety, free from blight, a sure cropper, hardy as an oak, and all in all a wonderful variety. Aug. and Sept.

Maiden's Blush. Large, flat; pale yellow with a red cheek; beautiful; tender and pleasant, but not highly flavored. Tree an erect grower, and a good bearer. A valuable market apple. Sept. and Oct.

Alexander. Of Russian origin. Large; deep red or crimson; flesh yellowish white, crisp, tender, with pleasant flavor. Tree very hardy. October.

Autumn Strawberry. Medium, streaked, tender, juicy, fine, vigorous and productive. Sept. to Oct.

Gravenstein. Highly flavored, productive, handsome and excellent. Fine in all localities. Sept. to Nov.

Wealthy. A patron writes that from 450 Wealthy apple trees five years planted, he sold \$600.00 worth of fruit, some trees yielding a barrel of apples. From one tree four years old he picked three bushels of apples. Wealthy is one of the best red early winter apples. Owing to its early bearing qualities it is planted largely as a filler. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. Oct. to Jan.

McIntosh Red. An exceedingly valuable, hardy, and attractive apple. A good annual bearer of fair, handsome fruit, being especially desirable for fancy trade. It comes into bearing young, yielding large crops of fine fruit almost annually. October to January.

Winter Varieties of Apples

Rhode Island Greening. Known Everywhere. This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and is a most abundant yielder. Dec. to April.

Twenty Ounce. Very large, yellow striped, red, fine quality apple; good keeper. Tree vigorous grower, productive. Oct. to Jan.

Grimes' Golden. Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Grown in the South and Southwest. January to April.

Hubbardston. (Hubbardston Nonsuch.) Large; striped yellow and red; tender, juicy and fine; great bearer. One of the best. Nov. to May.

Walbridge. Medium size, oblate, regular; skin pale yellow shaded with red; flesh crisp. Hardy and productive; late keeper. Jan. to May.

Wagener (Red Winter Apple). Wagener is one of the most beautiful winter apples ever grown. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener. It succeeds well East and West. No orchardist's list of varieties can be complete without this beautiful and superior flavored apple. Of medium to large size; firm fleshed, sub-acid and fine quality. Dec. to May.

Boiken. Annual bearer, vigorous grower. Fair size, hardy; bears young, very attractive and regarded as one of the most valuable apples of recent introductions. Nov. to Mar.

Paragon. Late keeper, large, of good color and quality, very productive. Dec. to May.

Longfield. An early and abundant bearer; medium to large; yellow, with a blush on sunny side. Dec. to Mar.

Mann. Fruit medium to large; skin deep yellow, flesh yellowish, mild, pleasant, sub-acid. An early and annual bearer. Jan. to Apr.

Wolf River. Fruit is very large, some specimens weighing 27 ounces, flattened, conical, highly colored. An excellent cooking apple. Sept. to Dec.

Sutton Beauty. Tree vigorous, upright, spreading, fruit uniform in size and shape, fine grained, crisp, tender, very good. Color bright red striped with carmine. Nov. to Mar.

Gano. An improved Ben Davis, adding to the good qualities of that variety a much handsomer fruit of deep, dark red, that brings a ready sale in market. Dec. to Mar.

Rome Beauty. A large and handsome apple, almost entirely covered with bright red, of high quality. The flesh is tender, juicy and highly flavored. It is a popular apple over a wide range of country, particularly in the West. Dec. to Mar.

Rambo. Fine in nearly all localities. Streaked and marbled with dull yellowish red on pale yellowish ground. Nov. to Mar.

Stark. Large, striped, mild sub-acid, good. Valuable as a keeper. Jan. to May.

Yellow Bellflower. Adapted to the northern and middle states; highly esteemed for its excellent dessert qualities. Oct. to Feb.

Northern Spy. A hardy, red winter apple, a vigorous and healthy grower, forming an upright tree of large size quicker than most varieties. It has no superior for beauty and quality. When at its best it is of large size and an abundant bearer, and a good keeper. Dec. to Feb.

Ben Davis is hardy and attractive, succeeds wherever apples are grown. There is no apple that has more favors on account of its hardiness, productiveness, beauty and endurance in shipping. Nov. to Apr.

Fameuse. (Snow apple.) Medium size; deep crimson; flesh snowy white, tender and delicious; valuable for market. Nov. to Jan.

King (King of Tompkins Co.) When you see in the market apples of extraordinary size, beautiful red in color, specimens that attract the attention of everybody who passes by, you may know that these are the King apple, an appropriate name since it is of the largest size

and possessed of the greatest beauty. The market is never fully supplied with this variety, since its size and beauty make it in great demand. Tree a vigorous grower, good bearer and hardy. Nov. to Jan.

Smokehouse. A very pleasant flavored dessert apple. Tree a vigorous grower, healthy, hardy and reliable cropper. Fruit of medium to large, uniform size and shape. Color yellow or greenish, mottled with rather dark red, sometimes deepening to a solid bright red. Oct. to Mar.

Baldwin. A great market apple, very productive of fair, handsome fruit. No variety yields larger crops or bears shipment better, or is more attractive in color and size and shape, than the Baldwin. It is esteemed as an eating apple, and for cooking. Thousands of barrels of this fruit are exported to England annually. Nov. to Mar.

Tolman's Sweet. Flesh firm, rich and sweet, valuable cooking apple. Nov. to Apr.

YORK IMPERIAL APPLES

York Imperial. Medium late. Fruit of medium size, round, oblate; skin greenish yellow striped with bright red; flesh yellow, crisp and juicy. Quality excellent. Good for home use or market. Nov. to Feb.

Winter Banana. Fruit large size, golden yellow, flesh fine grained, sub-acid, rich, aromatic flavor, and of the highest quality. Dec.

Northwestern Greening. A round, large attractive, greenish yellow apple; flesh fine grained, juicy, firm, good quality; splendid keeper; ships well, hardier than R. I. Greening and on that account considered valuable for districts where the climate is too severe for the R. I. Greening. Oct. to Apr.

Stayman's Winesap. A seedling of Winesap but larger, better and more productive. Dec. to Apr.

Best Hardy Crab Apples

Hyslop. Fruit large, deep crimson; produced in clusters; flesh yellow, sub-acid; good for cider and culinary purposes; popular on account of its large size, beauty and hardiness.

Transcendent. This is the best and largest of the Siberian Crabs. The fruits are 1½ to 2 inches in diameter, bright yellow, striped with red; excellent for culinary use. Immensely productive.

Ludlow, Vt., Apr. 15, 1913.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—I wish to thank you for the attention you gave my order. We have the trees all set out and they are a fine looking lot. We found not a single tree that was not all right; no roots or branches were broken in shipment and I was very much pleased all around. You may depend on my order for more trees next spring.

E. C. Ford.

Medium Size	3 to 4 Feet	$\frac{7}{16}$ to $\frac{9}{16}$	XX	.15	1.00	7.90
Smaller Size	2 to 3 Feet	$\frac{5}{16}$ to $\frac{7}{16}$	X	.10	.80	5.80

We will allow a 5% discount on all cash orders received before Oct. 15th, and 2% discount after that date.

Peach Growing is Today a Great Industry, in all probability more peaches are being planted annually than any other fruit. The comparative ease with which Peach trees may be cultivated, their freedom from disease, the short period before they come into bearing, together with the wonderful demand for the fruit, and the facility with which it may be shipped to markets, make peach growing extremely profitable.

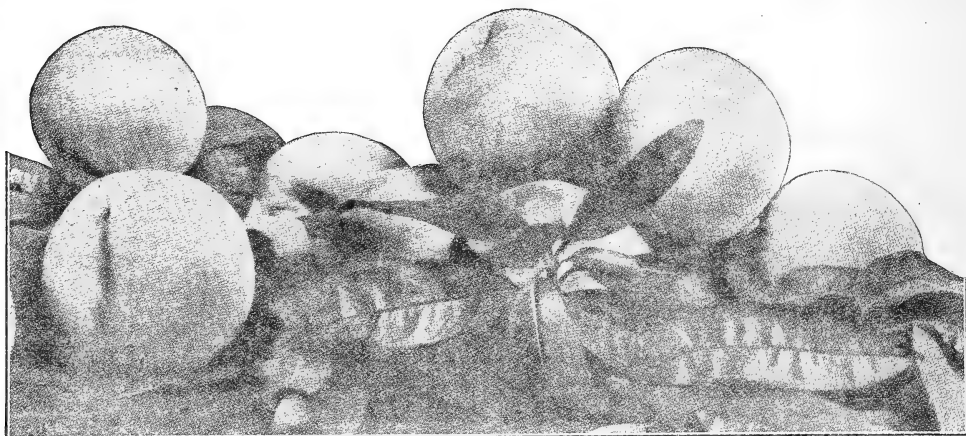

Here is the Important Question that Confronts Every Planter: Where are the peaches that you buy propagated? On some low land that will throw up a big, soft, spongy tree that will freeze out the first cold winter and just when you ought to have a good crop you find your fruit buds are killed? Or are they raised on the upland where they make a strong, hardy, healthy, vigorous growth?

Our Peaches are propagated on the upland at an elevation of 1,500 feet, therefore are absolutely hardy and proof against severe winters. **Our peach pits** are gathered in the mountains of North and South Carolina, where disease is unknown. These two facts prove beyond question of doubt why it is decidedly advantageous to plant Maloney Quality peach trees for best results.

Soil. Peach trees will succeed on any kind of rich soil, but will not thrive on clay, nor damp, low land.

Care of Peach Trees: To keep your trees in a healthy and vigorous state, that will insure good crops, you must keep your ground clean and mellow by harrowing. An occasional dressing of wood ashes will be very beneficial. Do your pruning in the spring. Cut out all dead and useless wood, thereby letting in the necessary light and air to give the fruit color.

Elberta Peach. Unsurpassed as a valuable, large, beautiful peach of good quality. The best orchard variety, and valuable also for planting in the garden. A friend near here has planted many acres entirely to Elberta. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. Elberta is large, yellow, with red cheek, juicy, and high flavored, flesh yellow, free-stone. Season medium early, following quick upon Early Crawford.

YELLOW ST. JOHN—The best early yellow freestone Peach

Yellow St. John. One of the best of the early yellow varieties exceedingly valuable for an early market variety, of medium size, orange yellow with a red blush on sunny side, flesh tender, juicy and quality very good. Popular in many sections. August 15th.

Crosby. Medium size; bright orange yellow streaked with carmine. One of the best standard market sorts. Sept. 1st.

Triumph. Earliest yellow-flesh peach, with good eating and shipping qualities, sure and abundant bearer; strong, vigorous grower.

Smock Free (Beers Smock.) Fruit large,

oval; skin orange yellow, mottled with red; a good market sort. Last of Sept.

Champion. Fruit large, beautiful in appearance; flavor delicious, skin creamy white, with red cheek; freestone. Trees hardy and prolific. One of the best varieties for home use.

Crawford's Late. Fruit of large size; skin yellow, or greenish yellow, with dull red cheek; flesh yellow; tree vigorous, moderately productive. One of the finest late sorts. Last of Sept.

Crawford's Early. A magnificent large, yellow Peach, of good quality. Tree vigorous and very productive. Its fine size, beauty and productiveness make it one of the most popular sorts; no other variety has been so extensively planted. Sept. 1st.

Chair's Choice. Has no superior in quality and flavor, and for profit is without a rival; large, yellow, free, rich in color, flesh very firm, and ripens after Smock; great bearer.

Foster. Large, deep orange red, becoming very dark red on the sunny side; flesh yellow, very rich and juicy, with sub-acid flavor; earlier than Early Crawford; very handsome.

Engle's Mammoth. Large, round, suture slight; yellow with red cheek; flesh yellow, stone small, free; sweet, rich, juicy. Sept.

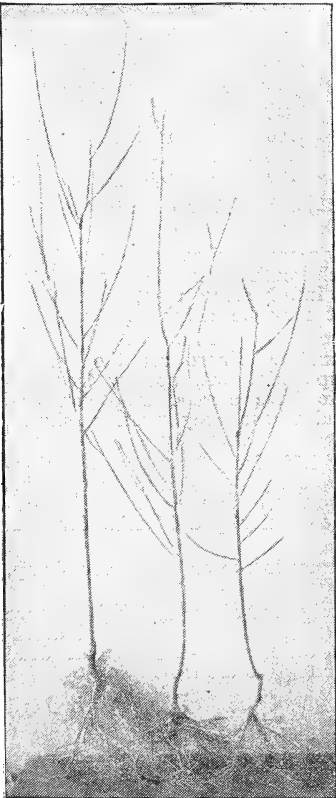

Fitzgerald. It is one of the hardiest peaches, both in bloom and tree; very prolific, large size. Sept 1st.

Early Rivers. Large, light straw color with delicate pink cheek; flesh juicy and melting.

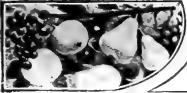

Carman. Fruit large, color creamy white or pale yellow with deep blush; flesh tender, fine flavor and quite juicy; one of the hardiest. Ripens with Early Rivers. Early Aug.

Niagara. One of the best peaches that has been introduced for many years past. There are many commercial orchards that are now bearing, not only in New York, but in other states as well. They are doing splendidly. The

Peaches

tree is hardy and healthy in leaf and bud and bears abundantly. Fruit large, oval, yellow with brilliant red cheek. The stone parts freely from the flesh. Flavor, rich and delicious, far ahead of Elberta in this respect. It is indeed a rival for this famous peach. Season is medium early, coming in just before Elberta, overlapping it one week. If you intend planting peaches, you will make no mistake in setting Niagara. Last of Aug.

Pears

Price of all Varieties of Standard Pear Trees

Budded on the Best French Imported Pear Stock

					EACH	TEN	HUNDRED
Largest Size	2 Year	5 to 7 Feet	$\frac{3}{4}$ and up	XXX	.35	\$3.00	\$24.75
Medium Size	2 Year	4½ to 6 Feet	$\frac{5}{8}$ to $\frac{3}{4}$	XX	.30	2.50	20.00
Smaller Size	2 Year	4 to 5 Feet	$\frac{1}{2}$ to $\frac{5}{8}$	X	.25	2.00	14.75
Largest Size	1 Year	3 Feet and up		XXX	.30	2.50	20.00

We will allow a 5% discount on all cash orders received before Oct. 15th, and 2% discount after that date.

The planting of Pears is on the increase, so much so that it has been difficult for us to supply the demand. This is especially true of Bartlett, Clapp's, Kieffer and Seckel which are the leaders and in the order as named.

Succession of Varieties. By judicious selection of varieties, a constant succession can be obtained so that you will have pears continuously from July to early Spring.

Soil. Pears will succeed best in a clayey soil, although any good heavy soil will do, but avoid planting on sandy loam.

6 to 7 ft. PEAR 5 to 6 ft. PEAR

We lead the United States on Standard Pears. Soil and climatic conditions make this possible.

Price for Standard Bartlett, Clapp's Favorite, Seckel and Worden Seckel grown on the best French Imported Pear stocks:

First class, largest size, 6 to 7 feet, 2 year, XXX, 25 cents each, 10 for \$2.30, 100 for \$19.00.

First class, medium size, 5 to 6 feet, 2 year, XX, 20 cents each, 10 for \$1.75, 100 for \$15.00.

First class, small size, 4 to 5 feet, 2 year, X, 14 cents each, 10 for \$1.25, 100 for \$9.00.

Sheldon. A large, round, russet-and-red Pear of the very first quality, Hardy, free-growing. Oct.

Beurre D'Anjou. A large, greenish Pear, shaded with russet-crimson; the flesh is high flavored, rich and vinous; the tree very productive, either as dwarf or standard. For late fall and very early winter use, we have no better variety. Oct. to Jan.

Lawrence. Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early winter Pear. The tree is hardy, healthy and productive, bearing large crops annually. Nov. and Dec.

Flemish Beauty. This fine old Pear is still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. Sept. and Oct.

Wilder. Handsome, melting, sweet, pleasant and of the best quality for an early Pear. Aug.

Duchesse d'Angouleme. Very large; greenish yellow, sometimes a little russeted. Makes a beautiful tree. Oct. and Nov.

Kieffer. This has become a profitable market variety on account of its good shipping and keeping qualities; its extraordinary size and beauty also make it very salable. While not of the best quality it is one of the favorite sorts for canning or preserving, and the early-bearing, heavy-cropping trees render it obtainable in quantity. Oct. and Nov.

Beurre Clairgeau. Large; light yellow, shaded with crimson and russet. Flesh yellowish, melting. Nov. to Jan.

Worden Seckel. A beautiful and delicious Pear, much larger than Seckel, equals it in flavor and quality, surpasses it in size, color and beauty.

75,000 Bartlett Pear Trees

The Finest in America

A Bartlett Pear Orchard Properly Located and Intelligently Handled is the Best Investment that a Man Can Make

For years we have been growing pear trees and today have the best block of 75,000 two year Bartlett pear trees in the United States. Every tree is from 5 to 7 feet in height, well branched and abundantly rooted. The soil of our nurseries is particularly adapted to their culture. No better trees than ours, either Standard or Dwarf, can be sent out from any Nursery. Danville trees are the very best obtainable. The Pear will grow on almost any soil, but thrives best in a rather heavy clay or loam.

A patron, H. D. B., Troy, N. Y., writes that he marketed 1000 barrels of pears, which were sold for \$3,250, and that the product of his sixty acre farm in 1903 was \$7,200, and in 1904 \$7,400.

Our patron, J. B. B., Boise, Idaho, writes that last year, from his three acre pear orchard, he picked 850 boxes, which sold in New York City for \$3,825.

Bartlett. Large, coloring when fully ripe to waxen yellow with red blush; juicy, melting, highly flavored. The tree bears early and abundantly. May be grown either as dwarf or standard, but succeeds best as a standard. Aug. and Sept.

Clapp's Favorite. A superb, large, long, yellow Pear, richly flushed with russet-red next the sun; juicy and delightful; ripens before Bartlett. Pick the fruit of this variety at least ten days before it ripens on the tree. Aug.

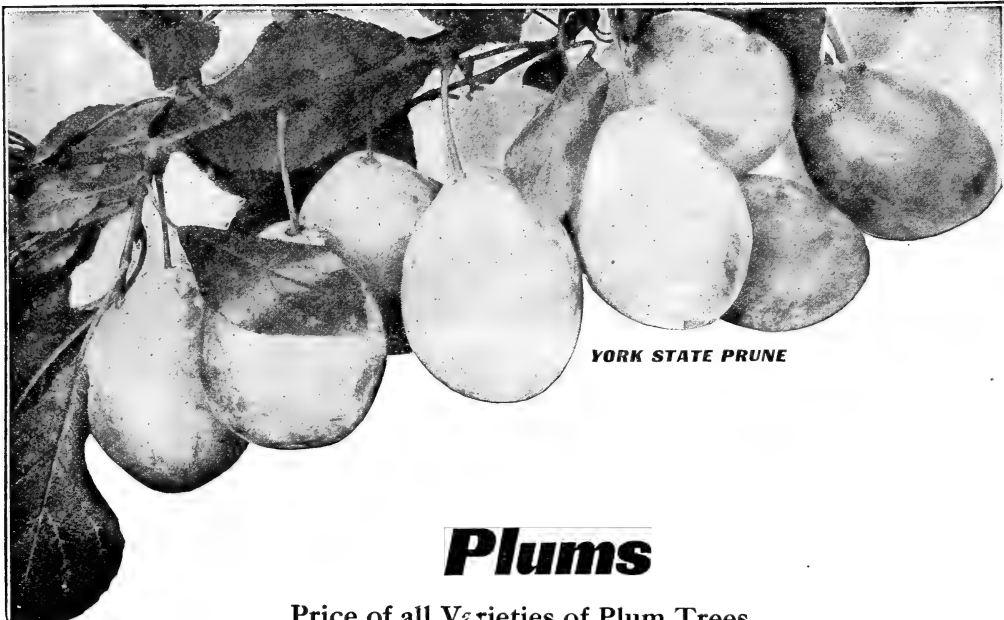

Seckel. A beautiful and delicious little Pear that is the standard of excellence in its class. One of the richest and highest-flavored Pears known, always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. Sept. and Oct.

Our Plums are all budded on whole roots of Imported French Myrobalan Stock.

The plum has not been planted as extensively as it deserves, and the lack of planting has doubtless been partly due to difficulty in marketing; but with the demand for good fruit in our eastern markets almost unlimited, and the establishment of canneries in most important fruit sections, it is again being planted in large quantities, as it is known that a little care and attention at the proper time will insure a profitable crop.

When making selection of varieties, do not overlook the Japanese sorts. These may be new to you, but they are valuable. Mr. Luther Burbank of California is to be credited with the introduction of the greater portion of Japanese varieties. Among the good ones that he recommends strongly are Burbank and Abundance, and any orchard is incomplete without these two varieties.

Soil. The best soil for Plums is a loose, deep, gravelly loam, with an open sub-soil, such as is suited for potatoes, although any soil may be used, provided it is well drained. For planting distance, see page 2.

Maloney Prune first came to our attention while growing in the garden of a good old Canadian living about one square from Mr. W. J. Maloney. Our friend invited us on the 15th day of November to see this tree as it then appeared. Imagine our surprise to observe a tree loaded with Prunes at that time of year, with fruit not only perfect but decidedly luscious. They had been using from the tree in a small way since the latter part of September. We kept a watchful eye on it the succeeding year and found exactly the same conditions. We were then convinced of its value, for it has the quality of a Fellemburg, the size of a York State Prune, and surpassing both for its long season extending from September 15th until freezing weather. Size large, color dark blue; flesh yellow and delicious; freestone; heavy annual bearer. It certainly is a marvel—just what the orchard man has been looking for.

Waltham, Mass., Nov. 14, 1912.

MALONEY BROS. & WELLS Co.,

Gentlemen: Never, since I bought my first nursery stock over forty years ago, have I been so well treated as by you, nor have I seen better trees or better root systems than yours. Out of all the trees that I bought for myself and neighbors last spring, only three failed to grow, in spite of the drought that we had for a whole month after planting. I shall try and duplicate my orders in the early spring.

Sincerely yours,

JAMES WORCESTER.

European Plums

York State Prune. One of the largest, best in quality and most productive of all prunes; large size, color dark blue, covered with purple black, delicious; originated in Dansville, N. Y.; a vigorous grower and hardy. Is being planted extensively and is considered the best for commercial purposes. Last of August.

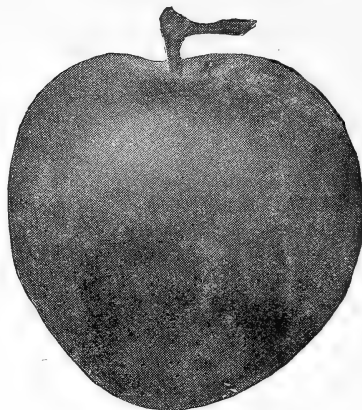

German Prune. Medium; oval; purple or blue; juicy, rich, fine. Tree vigorous and very productive. One of the best. September. Sells for higher prices in market on account of high quality. A leading favorite. There is no easily grown fruit that gives greater or more certain profit than the German Prune. Early Sept.

Hungarian Prune (Pond's Seedling). Very large dark red, juicy and very sweet. Its large size, bright color, productiveness and shipping qualities render it a profitable variety for home or distant markets. September.

Felleberg Prune. A fine prune, oval; purple; flesh juicy and delicious; parts from the stone; fine for drying; tree very productive. Early Sept.

Thanksgiving Prune. Very productive, good quality and long keeper. It will keep for weeks and months after picking like an apple. It is extremely hardy, as a matter of fact, will succeed in any state east of the Rockies; absolutely proof against severe winters. Mr. Maloney especially recommends this variety to you. Oct.

Imperial Gage. Rather large; oval; greenish; flesh juicy, rich and delicious, parts from the stone. Tree a vigorous grower; very productive and one of the best of plums. Middle of August.

REINE CLAUDE

Reine Claude (Bavay's Green Gage)—Roundish, oval, greenish, marked with red in the sun; a great favorite. September.

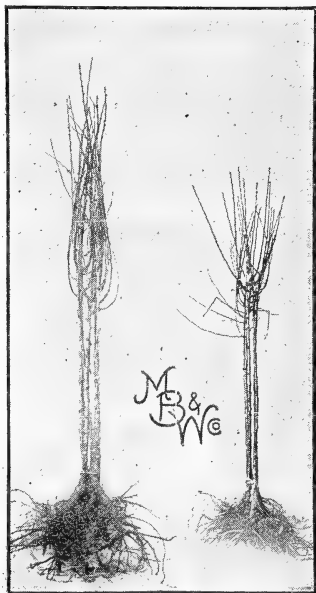

Pond's Seedling. A magnificent English plum; form of Yellow Egg; light red changing to violet; flesh rather coarse. Tree a vigorous grower and most abundant bearer. Sept.

Roosevelt. This variety was first offered under the above name as a premium by a publication at Rochester, N. Y., who claimed they had been watching this plum for the past few years and were surprised at the results obtained in that section. Roosevelt is very productive, fruit large, color purple, good quality, and unexcelled for eating and canning purposes. The tree is a hardy, vigorous, upright grower, and is one of the most remarkable plums yet introduced. It has been thoroughly tested by prominent orchardists. Oct.

Monarch. Tree an abundant bearer. Fruit large, dark purplish blue with dense foliage. Oct.

Diamond. A large magnificent plum, color a dark purple, with a beautiful bloom. Tree hardy and productive. Sept.

Coe's Golden Drop. Very large, light yellow often dotted with red in the sun; an excellent late sort. Last of Sept.

2 Yr. 6 to 7 Ft.

2 Yr. 5 to 6 Ft.

Hardy Upland Grown Plums

Our 29th Year

At Growing and Delivering Trees Direct from the Nursery to the Planter.

DANVILLE'S PIONEER WHOLESALE NURSERIES

Green Gage. Flesh pale green, melting, juicy, exceedingly sweet and rich and unequalled. Aug. 15th.

Bradshaw. A very large and fine early plum, dark violet red, juicy and good. Very productive; valuable for market. The tree is very hardy and vigorous. As regards productiveness it is unequalled by any plum we have ever fruited. To produce the finest fruit, heavy thinning should be practiced. The quality is excellent, and is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety. Middle of August.

Gueii. This is one of the newer varieties originating in New York state. Season of ripening rather late. The color is a dark purple. The flesh is firm, sub-acid and agreeable. Size large. It would be difficult to select a larger or more attractive plum for the garden or orchard than this. Sept.

Shipper's Pride. Large, nearly round; dark purple; quite juicy, sweet; splendid shipper and marketer; moderate grower; productive. Originated in northwestern New York. September.

Niagara. Red, large size, making an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit. Tree is an upright grower, vigorous and healthy. Middle of August.

Burbank is decidedly the best of Japan varieties unsurpassed for beauty and productiveness, as well as a very hardy tree with foliage so perfect as to contribute in an essential degree to its health. One of the grand points about the Burbank is that it succeeds over a wide range of our country, and will stand the most severe winters. Fruit large, oval, with a reddish purple skin; flesh yellow, juicy and good. A good one. Aug.

Wickson. This largest of the Japan Plums is superb in every way. The color is bright cherry-red, covered with a light bloom; the pit is small for so large a fruit, the flesh is thick, sweet, tender and rather dry, indicating good keeping and shipping qualities. The fruit sells almost on sight. September.

Red June. The great early market Plum. Medium to large; deep vermilion-red, with beautiful bloom; very showy; flesh light lemon-yellow, firm, slightly sub-acid, delightful. It is the best in quality of any of the early Japanese plums, free from rot. Ripens in early August.

Abundance. One of the best Japan Plums. The tree a rapid grower, healthy, comes into bearing remarkably young and yields abundantly.

Tatge. Evidently a seedling of the Lombard. Is larger, more nearly round, darker color and finer quality than that well known variety. Claimed to be the hardiest, most productive and longest-lived plum known. Sept.

Lombard. Has always been a great favorite with plum growers. The tree adapts itself to all localities and it is very productive and extremely hardy. In our experience it outyields all other varieties. The fruit usually hangs so thick that we are compelled to thin out one-half. The more you thin it, the larger, brighter and better the remaining fruit will be. It is a handsome reddish plum, the flesh yellow, juicy and pleasant. It is an excellent variety and can be relied on for a crop when other varieties fail. Aug.

Moore's Arctic. Valuable for its productiveness and extreme hardiness. Fruit grown in clusters. Color dark blue or nearly black when fully ripe. Dr. Hoskins says this is the hardest plum he has tested. Sep.

Shropshire Damson. One of the favorite Damsons. Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color, esteemed for preserving. October.

Grand Duke. One of the best late plums for market, as large as Bradshaw, of same color, entirely free from rot. Last of September.

General Hand. A very large plum, roundish; color, deep yellow; flesh juicy. Sept.

Japan Plums

Fruit of medium size, large, when thinned; amber, with markings of red; juicy, sweet, of good quality when well ripened. May be picked when it begins to color; will keep a long time. August.

Satsuma (Blood). A delicious Plum for canning, already famous for that purpose, and a grand market sort; in season after the European Plums and the main crop of peaches are gone. Very large, nearly round, with deep red skin and flesh; firm, of good flavor; will keep from one to three weeks after picking. Yields well. Aug.

Climax. Tree extremely vigorous, upright, with strong branches and very large leaves. Productive as Burbank, about as large and usually two or three weeks earlier. July.

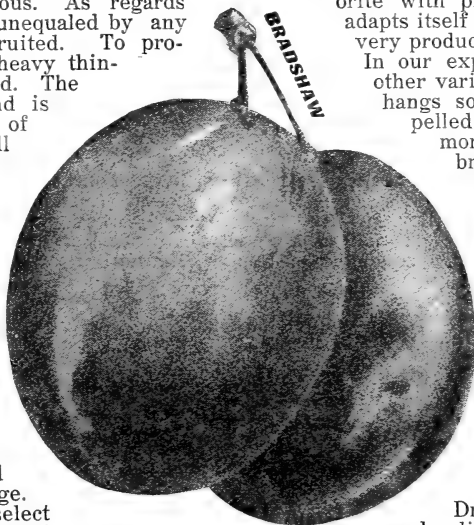

Meriden, Conn., Nov. 2, 1912

MALONEY BROS. & WELLS Co.,

Gentlemen: The plum and apple trees arrived in fine shape. They are certainly good trees and well worth the money. Thanks for prompt attention.

Yours sincerely,

George O. Knipfer

WILDER DWARF

Dwarfs

Dwarf fruit trees bear larger, better fruit, bear several years earlier, and produce more returns for a given space than standard trees. This is all true and there are even more important points. The low, broad heads are within reach, so that apples or pears can be easily picked. You can plant dwarf trees in your garden and still grow strawberries and most vegetables. With dwarfs some varieties will bear the first year, all will the second year and bear a full crop the fourth year.

You can plant forty trees in a small space, save several years, get better fruit and each tree should bear a bushel a year.

We offer the best trees budded on Paradise or Doucin stocks. They will succeed in many places where standard trees fail. In a word, they are the kind of Dwarf trees that will put their strength into fruit instead of wood. To insure best selection of varieties order at once since our supply is limited.

Bargains in Fruit Trees

Smaller Size

Some buyers of trees have an idea that nothing but the largest size trees are fit to plant, that all other sizes are poor trees. This is a mistake, as some of the best orchards are grown from the smaller size trees. Our four to five foot trees are not third class, but first class of their size, and while we do not recommend the small planter, or one who plants but a few trees, to select these for his planting, we do recommend the medium and small trees to the orchardist. We have an especially nice lot of peaches, apples, pears, cherries and plums at special prices.

ORANGE QUINCE

Orange. The best of the older varieties, still more extensively cultivated than any other. Its large, roundish fruit ripens in October.

Angers. A productive old sort, with rather acid fruit.

Price for all varieties of Quince trees :

First class, largest size, 4 to 5 feet, XXX, 18 cents each, 10 for \$1.75, 100 for \$15.00.

First class, medium size, 3 to 4 feet, XX, 12 cents each, 10 for \$1.15, 100 for \$10.00.

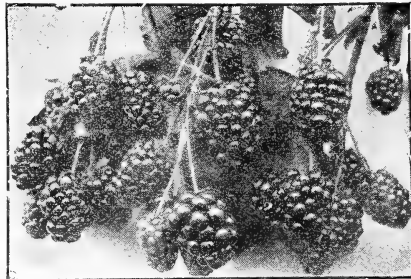

Blackberries

Blackberries for garden culture, plant four feet apart in rows five feet apart. For field culture plant three feet apart in rows six feet apart. Pinch back canes when three or four feet high, and allow but three canes to the hill. Give about same treatment as raspberries. Blackberries should be picked when a full, glossy black. Berries that have become dull-looking are too ripe for marketing. Blackberries should not be picked when moist, either after rain or heavy dew. The moisture causes development of mould and results in decay.

Mersereau. Remarkably strong grower, upright, producing stout, stocky canes. Claimed to be the hardiest Blackberry, standing uninjured 20° below zero without protection. An enormous producer of extra-size berries, which are brilliant black and retain color; extra quality; sweet, rich and melting, without core. Ripens very early.

Eldorado. The vines are very hardy and vigorous, enduring the winters of the far Northwest without injury, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired.

Minnewaska blackberries has been \$300 per year for the past five years.

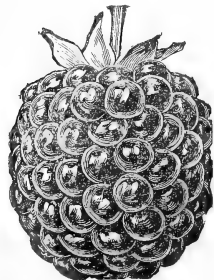

Snyder. Extremely hardy, enormously productive; medium size, no hard, sour core; sweet and juicy. The leading variety where hardiness is the consideration. Ripens early.

Sidney, N. Y.

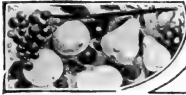

Maloney Bros. & Wells Co., Danville, N. Y.

Gentlemen:—Berries and currants arrived in nice condition. Trees all started in fine shape. Have never seen trees start off like this before in my experience. Thanks for your generosity. The Maples are worth what I paid for the whole order. Will remember you when I want anything more.

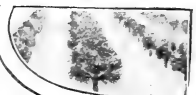

Richard Lewis.

states that his average receipts from an acre of

DANVILLE'S PIONEER WHOLESALE NURSERIES

The Loudon is the Best Hardy Red Raspberry on Earth

Loudon Raspberry, the hardiest of all, yields 200 bushels per acre, bears best on strong clayey loam, but succeeds well on sand. Prof. Van Deman has pronounced Loudon the best of all red raspberries. Considering its hardiness, productiveness, large size, quality and bright color, it will be difficult to secure a better raspberry.

Price of Loudon Raspberry plants, extra strong: 25 for \$1.00, 100 for \$2.00, 1000 for \$15.00.

The Cuthbert Red Raspberry. Large, Productive, Attractive

This is a valuable variety well tested throughout the country. It has given good results both for home use and market. Cuthbert is a good vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully of large and beautiful bright red berries, which are easily picked and always command good prices. No fruit grower can afford to omit planting Cuthbert, and surely no person who has a garden should attempt to get along without red raspberries.

Price of Cuthbert Raspberry plants, extra strong, 25 for \$1.00, 100 for \$1.50, 1000 for \$10.00.

Gooseberries

Plant in good rich soil and give a liberal dressing of manure every season. Regular pruning every year is essential for the production of fine fruit. The English varieties especially do best in partial shade and should be heavily mulched.

Columbus. Bush a strong, robust grower; foliage large and glossy. Fruit large, oval; skin greenish yellow, smooth; of the highest quality.

Josselyn. (Red Jacket.) An American seedling of large size; smooth, prolific and hardy; of best quality.

Industry. This is without doubt the most thoroughly tested of the English varieties. The bush is strong, upright, immensely productive. Berries of the largest size, dark red, of excellent quality.

Price for all varieties of Gooseberries named above, strong 2 year bushes, 20 cents each, 10 for \$1.75, 100 for \$9.00.

Downing Gooseberry. Is the largest and best of all native American varieties. The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew.

Price of Downing Gooseberry, strong 2 year bushes, 15 cents each, 10 for \$1.25, 100 for \$10.00. Write for 1,000 prices.

Chautauqua. Bush very vigorous, stout, upright; foliage large, glossy, dark green. Fruit large, smooth, veined, translucent; skin thick; quality very sweet and high-flavored.

Price of Chautauqua Gooseberry, strong 2 year bushes, 30 cents each, 10 for \$2.50, 100 for \$20.00.

Black Raspberries

Kansas Black Raspberry is a strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops.

Conrath, Early Black Raspberry. In Conrath we have united vigor, hardiness, large size and productiveness; qualities that will give a foremost rank.

Cumberland New Black Raspberry. This berry with its greatly superior size combines the equally valuable characteristics of great firmness, splendid quality and wonderful productiveness. The plants are entirely hardy, very vigorous and healthy.

Gregg Black Raspberry. Of good size; fine quality; very productive and hardy. It takes the same position among blackcaps as Cuthbert among the red sort.

Columbian Purple Raspberry is a new variety, much resembling Shaffer in growth of bush and fruit. A strong grower, unexcelled for productiveness, and desirable for canning. Nine rows, 150 feet long, yielded 66 bushels. Color of berry purple, like the Shaffer.

Price for all varieties of Black and Purple Raspberries named above, strong, well rooted plants, 25 for 65 cents, 100 for \$1.50, 1000 for \$13.00.

Maloney's Packing

Insures safe arrival of berries at destination.

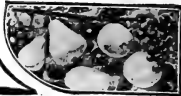

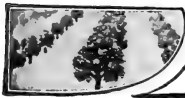

Rivington, Quebec, Canada, May 22, 1912.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—I received your trees a short time ago, and I am well pleased with them. I must say you certainly know how to put trees up in good shape for a long journey so they cannot dry out. They were in as good shape when they reached here as if they had just been dug.

I wish you all kinds of success with your nursery.

Very truly yours,
Geo. L. Ward.

Grapes

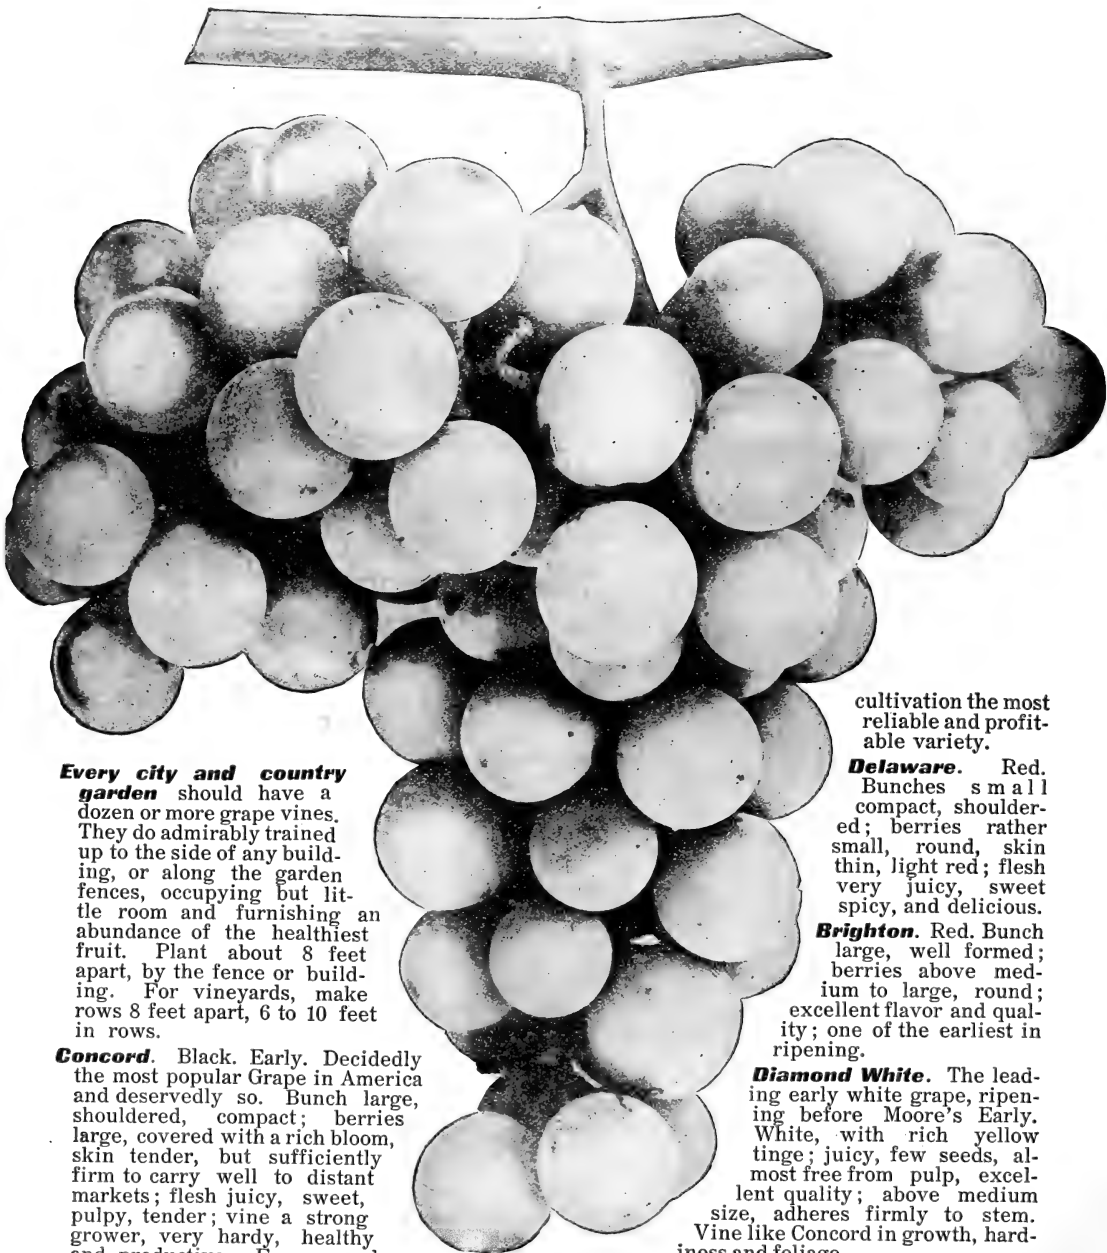

Price of Grapes, 2 Year, Vigorous Vines

Brighton, Catawba, Diamond, Delaware, Moores Early, Niagara 15c each, \$1.00 for 10, \$6.00 for 100.

Campbell's Early: 20c each, \$1.50 for 10, \$12.00 for 100.

Concord: 10c each, 70c for 10, \$4.00 for 100, \$30.00 for 1000.

Worden: 10c each, 80c for 10, \$5.00 for 100, \$40.00 for 1000.

Every city and country garden should have a dozen or more grape vines. They do admirably trained up to the side of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest fruit. Plant about 8 feet apart, by the fence or building. For vineyards, make rows 8 feet apart, 6 to 10 feet in rows.

Concord. Black. Early. Decidedly the most popular Grape in America and deservedly so. Bunch large, shouldered, compact; berries large, covered with a rich bloom, skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet, pulpy, tender; vine a strong grower, very hardy, healthy and productive. For general

cultivation the most reliable and profitable variety.

Delaware. Red. Bunches small compact, shouldered; berries rather small, round, skin thin, light red; flesh very juicy, sweet spicy, and delicious.

Brighton. Red. Bunch large, well formed; berries above medium to large, round; excellent flavor and quality; one of the earliest in ripening.

Diamond White. The leading early white grape, ripening before Moore's Early. White, with rich yellow tinge; juicy, few seeds, almost free from pulp, excellent quality; above medium size, adheres firmly to stem. Vine like Concord in growth, hardness and foliage.

CONCORD

Grapes (Continued)

Worden. Black. Bunch large, sometimes shouldered, compact; berries very large, skin thin. Superior to the Concord in the following points: it is better in quality, has a larger berry, a more compact and handsome cluster and ripens five to ten days earlier.

Moore's Early Black. Bunch large, berry large round with heavy bloom, vine exceedingly hardy. Its earliness makes it desirable for an early market. Its hardiness particularly adapts it to Canada and northern portions of the United States; succeeds admirably in the south.

Campbell's Early Black. Strong grower, with large, healthy foliage, productive; its keeping and shipping qualities are equalled by no other early grape. Ripens with Moore's Early. Bunch and berry large, glossy black with blue bloom, sweet and juicy, seeds few and small, part readily from the pulp. Stands at the head of early black grapes for quality.

Niagara White. Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to pale yellow when fully ripe. Skin thin but tough; quality much like Concord.

Grape Vines at a Bargain

12 Strong 2-Year Vines for 75c.

We offer 3 Worden, black; 3 Concord, black; 1 Campbell's Early, black; 2 Brighton Red; 3 Niagara, white. All 2-year old, first Class Grape Vines for 75 cents, regular price being \$1.10.

Catawba. Dark red when fully ripe. Bunch large, berries medium to large, skin thick, tough; flesh somewhat pulpy, with rich vinous flavor, of best quality for both table and wine.

McKinley Early (New White). Strong grower; bunches large, compact and handsome; berries large and oval like Malaga Grapes; green at first, turning to yellow when fully ripe; very sweet. Extra quality; a good shipper; remarkable keeper; will hang on vines sound and perfect for weeks after ripe. Ten days earlier than Niagara with the richest flavor of any Grape on the market.

Garden Roots

Rhubarb or Pie Plant

This affords the earliest material for pies and tarts; continues long in use and is valuable for canning. Make the border very rich and deep; needs high culture.

Linnaeus—Large, early, tender and fine. The very best of all.

10 cents each, 80 cents per 10, \$6.00 per 100.

Asparagus

To plant, see that the ground is well drained. Work it up fine and deep, make it very rich with well-rotted manure. Locate the plants eight inches apart in rows three feet apart, spread out the roots in a trench made deep enough to permit the crowns to be covered with three or four inches of mellow earth. Give the bed a dressing of manure and except near the seashore three pounds of salt early every spring. Do not cut for use until the plants have grown two seasons.

Palmetto. A very early variety even, regular size and of excellent quality. It has been tested both north and south and has proven entirely satisfactory.

25 cents per 10, \$1.00 per 100, \$6.00 per 1,000.

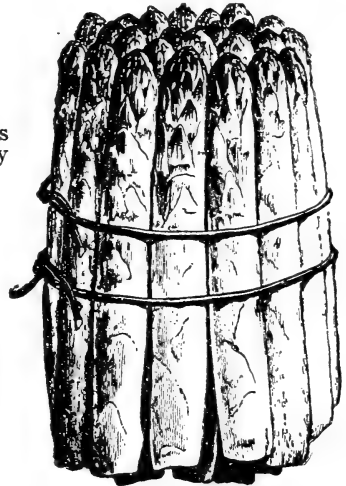

Conover's Colossal. Very large, makes rapid growth; planted mostly by market-gardeners; very productive.

25 cents per 10, \$1.00 per 100, \$6.00 per 1,000.

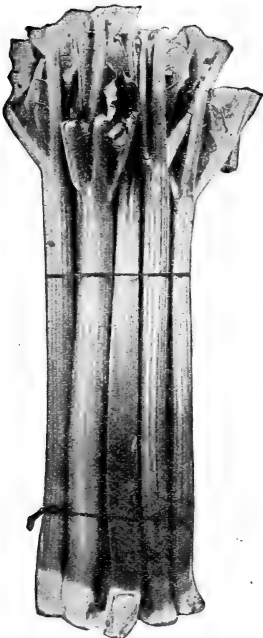

HOLT'S MAMMOTH SAGE. Plants of strong growth. Leaves large, borne well above the ground. Of strong flavor and superior quality. Price of strong 2 year roots, 10 cents each, 10 for 75 cents.

HORSE RADISH. Will stand a great deal of hardship and exist in soil year after year. Plant in deep, rich, cool soil. The yield will vary according to the soil and treatment. As high as ten tons have been secured from an acre.

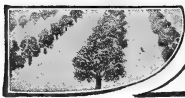

Price: Strong Sets, 25 cents per 10, 75 cents per 100, \$6.00 per 1,000.

ASPARAGUS

PIE PLANT

Currants

Price of all Varieties of Currant Bushes

(except where otherwise noted)

	EACH	TEN	HUNDRED	THOUSAND
2 year	.10	.75	\$5.00	\$45.00

Plant in rows 6 feet apart and 4 feet apart in the rows, or if to be cultivated both ways, 5 feet apart each way. Before planting, the roots should be shortened to 10 or 12 inches, and in planting care should be taken to firm the earth about the roots. After planting, cut back the tops about one-half the previous year's growth. No plant will better repay generous treatment and high cultivation than the currant. Two or three forkfuls of good stable manure around each bush every fall is desirable.

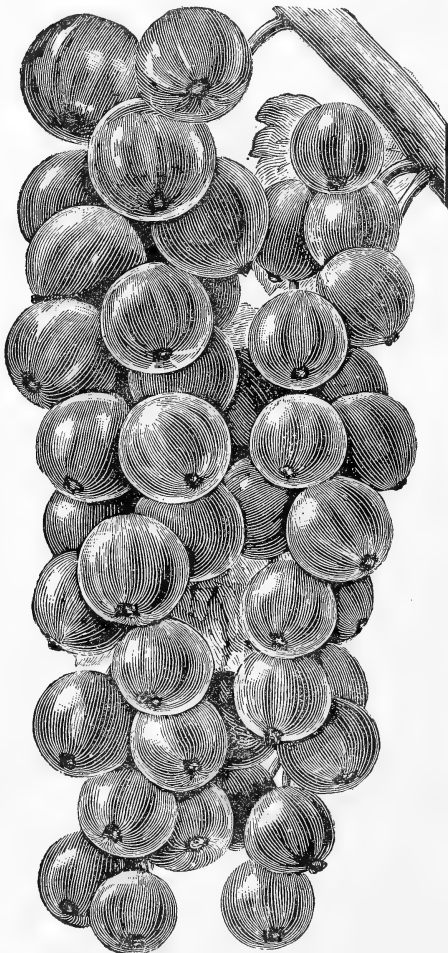

Wilder (President Wilder). Bush upright, vigorous; clusters above medium length; berries large to very large, averaging large; bright red; excellent, with a mild sub-acid flavor. Ripens early and remains bright and firm until very late. Because of its exceedingly vigorous growth, great productiveness, high quality and remaining good so long after ripening, we recommend this as one of the best red currants, both for table and market.

Home Garden Collection of Currants

10 Bushes, 2 year old, for 60 cts.

3 Red Cross, 3 President Wilder
2 White Grape 2 Black Champion

10 Strong, 2 year Currant Bushes,
Special Bargain Price, 60 Cents.

PRESIDENT WILDER

Cherry. Bush vigorous, stocky and compact; cluster rather short, with short stems; fruit averages large; color fine, bright red; berry thin-skinned, juicy and fine-flavored. One of the most productive of the large Currants.

White Grape. Bush vigorous, somewhat spreading, productive; clusters long; berries large to very large, averaging large; of very attractive color, mild flavor and good quality. A good table variety.

Red Cross. A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. It is exceedingly productive, and the currants are of large size. Further than this, the fruit is far sweeter than ordinary currants.

Black Champion. Bush vigorous, and productive; fruit averages above medium; pulp nearly sweet, mild-flavored. A desirable variety for general culture.

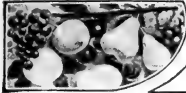

Fay (Fay's Prolific). Bush vigorous but not quite so strong a grower as Cherry; cluster medium to long, with rather long stems; color darker; and berry averages large; juicy and less acid than Cherry. The high prices prevailing this year teach that the proper thing to do is to go right along growing fruit whether the price is high or low. It certainly does not pay to stop growing simply because prices for a year or two are low.

Red Dutch. An old, well-known sort, good quality berry, medium, long bunch. Very productive.

Victoria. Bright red, bunches extremely long; berries medium size, of excellent quality. Good erect grower, very productive. Ripens late, making it one of the most valuable sorts.

Perfection. In color it is a beautiful bright red, a size larger than the Fay; clusters average longer and the size of berries are maintained to the end of the bunch. It is one of the most productive Currants we have ever known; quality is superior to anything in the market, being of a rich, mild sub-acid flavor and having plenty of pulp with few seeds.

Price 2 yr., 20 cents each, \$1.50 per 10, \$12.00 per 100.

DANVILLE'S PIONEER WHOLESALE NURSERIES

Russian Apricots

Beautiful and delicious fruit. In quality and appearance is between plum and peach, combining qualities of both. Ripening early, together with its delightful flavor makes it one of the most valuable fruits. Tree hardy as the peach. Requires about the same cultivation as the peach or plum. It ships well and commands a good price in any market. For drying and canning, it has no superior. The Russian varieties are quite distinct from the other European sorts; much hardier, earlier bearers and productive.

Alexander. Very hardy and immense bearer; fruit large; yellow, flecked with red; very beautiful, sweet and delicious. July.

Alexis. Very hardy and abundant bearer; yellow with red cheek; large to very large; slightly acid, rich and luscious. July.

Gibb. Tree hardy; grows symmetrical; productive. Fruit medium; yellowish, sub-acid, juicy and rich. The best early variety, ripening soon after strawberries. Last of June.

J. L. Budd. Tree a strong grower and profuse bearer. Fruit large, white with red cheek, sweet, juicy with a sweet kernel, as fine flavored as an almond. The best late variety. August.

Moorpark. One of the largest. Orange with red cheek; firm, juicy, with a rich flavor; very productive. August.

Nut Trees

American Sweet Chestnut is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes. As high as \$14.00 per bushel has been paid for American Sweet Chestnuts when first brought into New York market. \$6.00 to \$10.00 per bushel is the common price. A well grown American Chestnut that has passed the quarter-century mark is a gracious delight to the eye of the lover of trees, and there is a peaceful, dignified impressiveness about a grove of old chestnut trees that is good to experience.

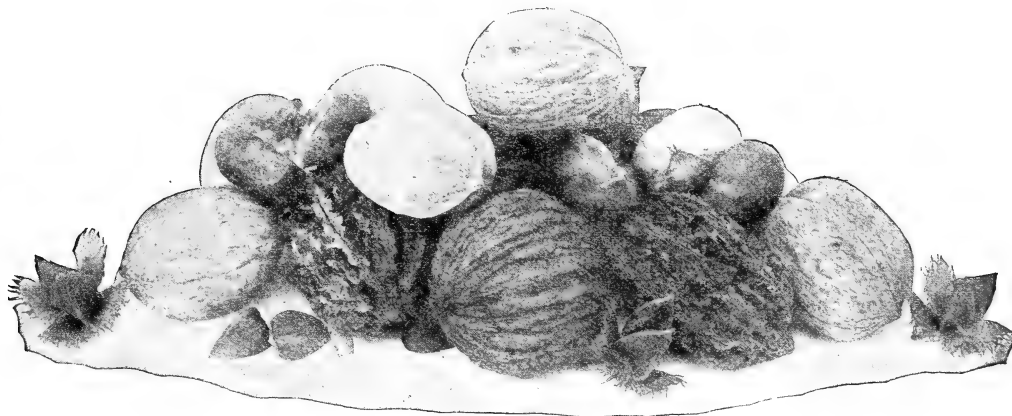

Price, 4 to 5 feet, 35 cents each, 10 for \$3.00; 3 to 4 feet, 30 cents each, 10 for \$2.50.

English Walnut. A fine, lofty, growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. They are fairly hardy and are fruiting here in the Genesee Valley.

Price, 3 to 4 feet, 50 cents each, 10 for \$3.75.

Black Walnut. The common well-known Black-Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are much liked by many.

Price, 4 to 5 feet, 35 cents each, 10 for \$3.00; 3 to 4 feet, 30 cents each, 10 for \$2.50.

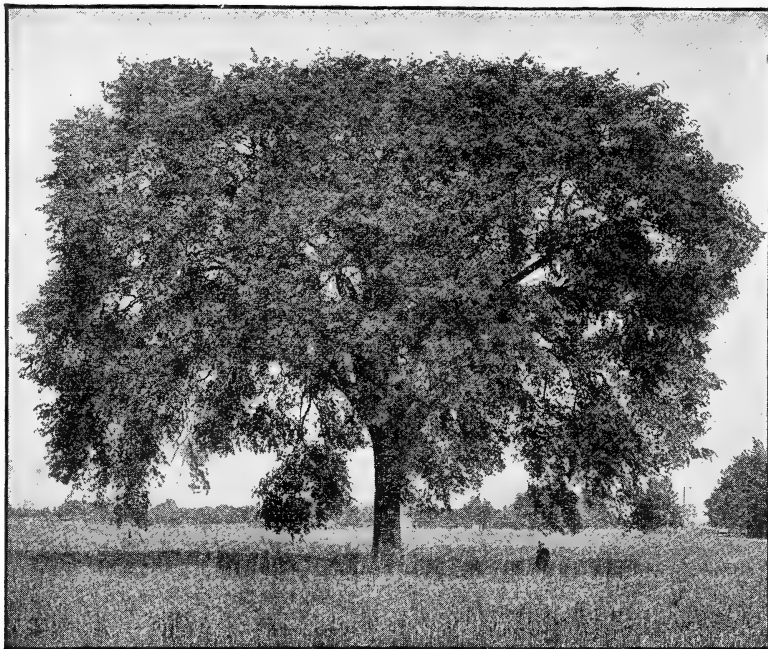

Chestnut, Spanish. A handsome round headed tree, producing abundantly, very large nuts that find a ready market at good prices.

Price of Spanish Chestnut trees, 4 to 5 feet, 50 cents each, 10 for \$3.00.

Butternut. A fine native tree producing a large longish nut, which is prized for its sweet, oily, nutritious kernel.

Price of Butternut trees, 4 to 5 feet, 35 cents each, 10 for \$3.00.

Select Varieties of Ornamental Trees

American Elm, the most famous of all American Trees

American Elm. The most admired of all American trees. A natural spreading and drooping tree of our own American meadows and forests, spoken of by many as the most beautiful of all American trees. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other one variety. This is on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world.

Price of American Elm trees, 8 to 10 feet, 50 cents each. 10 for \$4.50, 6 to 8 feet, 40 cents each, 10 for \$3.50.

Cut-Leaved Weeping Birch. This noble tree is not only the most popular of the weeping trees, but it is decidedly the best. Its tall, slender, yet vigorous growth, graceful branches, silvery white bark, and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree.

Price of Cut-Leaved Weeping Birch, 5 to 6 feet trees, 40 cents each, 10 for \$3.00.

Wier's Cut-Leaved Maple. One of the most remarkable and beautiful trees, with cut or dissected foliage. Its growth is rapid, shoots slender and drooping, as graceful as cut-leaved birch.

Price of Wier's Cut-Leaved Maple trees, 8 to 10 feet, 60 cents each. 6 to 8 feet, 50 cents each, 10 for \$4.50.

California Privet. A vigorous-growing variety, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up many strong shoots. The leaves are a rich green and will remain on the plants up to Christmas, and if they are a little sheltered they will keep green almost all winter.

Price of California Privet strong plants, 18 to 24 inch 5 cents each, 10 for 45 cents, 100 for \$3.00, 1000 for \$25.00; 24 to 30 inch, 8 cents, 10 for 65 cents, 100 for \$4.50, 1000 for \$40.00.

Remember, we give **PERSONAL ATTENTION** to each and every order, for Mr. A. E. Maloney superintends the digging and packing of your order and Mr. W. J. Maloney looks after your interests in the office, thereby assuring you of the best service possible.

Maple, Ash-Leaved (Box Elder.) A fine, rapid-growing variety, with handsome, light green foliage and spreading head; very hardy; desirable for street planting and succeeds in many sections where other varieties do not thrive.

Price of Ash Leaved Maple trees, 8 to 10 feet, 35 cents each, 10 for \$3.00; 6 to 8 feet, 30 cents each, 10 for \$2.75.

Norway Maple. This is one of the hardiest ornamental shade trees, and one of the most beautiful. It makes more of a wide spreading tree than the sugar maple.

Price of Norway trees, 8 to 10 feet, 45 cents each, 10 for \$4.00. 6 to 8 feet, 35 cents each, 10 for \$3.00.

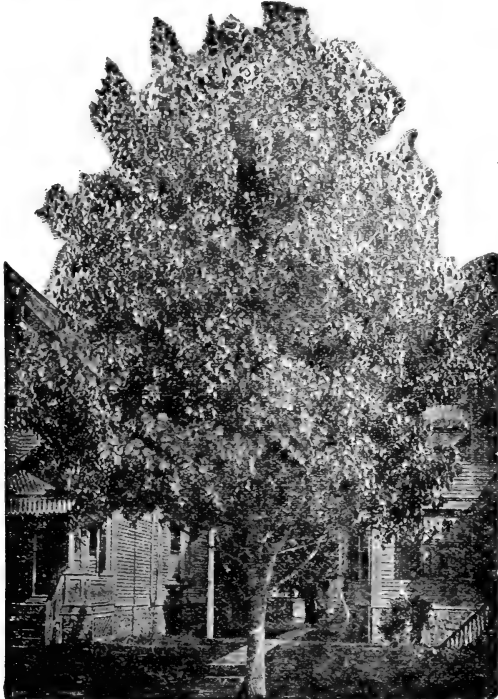

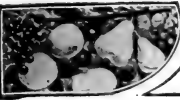

Sugar or Rock Maple. This native tree of ours is a universal favorite for street planting, and desirable everywhere. It is considered a slow grower, but is long-lived.

Price of Sugar Maple Trees 8 to 10 feet, 45 cents each, 10 for \$4.00. 6 to 8 feet, 40 cents each, 10 for \$3.50.

Maple, Silver Leaved or Soft. Foliage bright green above and silvery underneath. An exceedingly rapid grower. Makes a large tree. A very satisfactory tree to plant in large quantities.

Price of Silver Leaved Maple, 8 to 10 feet, 40 cents each, 10 for \$3.50. 6 to 8 feet, 35 cents each, 10 for \$3.00.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

Carolina Poplar

New Large Leaved Carolina Poplar

This tree takes front rank among the best of poplars. It is one of the most rapid growers among shade trees, frequently growing eight feet during one season and thus making fine shade in two or three years. Its branches spread enough to give it a symmetrical, commanding form of elegant appearance. It is very desirable when planted at the roadside, in parks or along rivers and streams. It has an advantage over other shade trees because it will grow in any kind of soil. It is easily transplanted, and gives dense shade in a short time. For a quick grown shade tree there is no tree that equals the Carolina Poplar. It is also very largely planted as a screen to shut out unattractive buildings.

Bargain Prices for Carolina Poplar trees:
 10 to 12 feet high, 20 cents each, 10 for \$1.50,
 100 for \$12.00.
 8 to 10 feet high, 15 cents each, 10 for \$1.35,
 100 for \$10.00.
 6 to 8 feet high, 10 cents each, 10 for 80 cents,
 100 for \$7.50.

Franklinville, N. Y., Nov. 1st, 1910.
 Maloney Bros. & Wells, Dansville, N. Y.

Gentlemen:—The Poplar trees arrived this morning and look good to me. They are better trees than the ones I have paid 65 cents each for.

Very truly yours, Geo. F. Fries.

Thorn, Paul's Double Scarlet. Flowers deep crimson, with scarlet shade; very double.
Price of Trees 3 to 4 feet, 35 cents each, 10 for \$3.25.

Thorn, Double White. Small, double, daisy-like flowers in clusters.
Price for first class Trees 3 to 4 feet, 35 cents each, 10 for \$3.25.

Teas' Weeping Mulberry. The most graceful and hardy weeping tree in existence. Forms a perfect shaped head, with long, slender, willow branches, drooping to the ground.
Price, 4 to 5 feet \$1.00 each.

Russian Mulberry. Very hardy, vigorous grower, very productive, fruit black and of medium size.
Price, 6 to 8 feet, 50 cents each, 10 for \$4.50.

Mulberry, Downing. This tree is not alone valuable for the large refreshing berries it bears, but is very handsome as a lawn or street tree. This should be in every yard or garden.
Price, 4 to 5 feet, 50 cents each, \$4.50 per 10.

Hardy Climbing Vines

Ampelopsis Veitchi (Boston Ivy.) This is one of the finest climbers we have for covering walls.

Price, 2 year plants, 25 cents each, 5 for \$1.00.
Wisteria, Chinese Purple. A most beautiful climber of rapid growth and producing long pendulous clusters of pale blue flowers.
35 cents each, 10 for \$3.00.

Paniculata Clematis. The flowers are of medium size, fragrant, pure white, borne in immense sheets in September, when very few other vines are in bloom.

Price of strong 2 year plants, 35 cents each, 10 for \$3.00.

Jackmanni Clematis. The flowers are large, intense, rich, velvety violet-purple, and are produced in such masses as to form a cloud of bloom.

Price 2 year plants, 35 cents each, 10 for \$3.00.

Salem, Mass., April 20, 1912.

Thorn, Double Pink. Double pink or rose flowers, with white tips. Price for first class Trees 3 to 4 feet, 35 cents each, 10 for \$3.25.

American Linden or Basswood. A rapid growing, large-sized, beautiful native tree, with very large leaves and fragrant flowers.

Price of American Linden trees, 6 to 8 feet, 50 cents each, 10 for \$4.50.

Horse Chestnut, White Flowering. The well-known European species; very handsome; has magnificent spikes of white flowers. As a lawn tree or for the street it has no superior.

Price for Trees 4 to 5 feet, 45 cents each, 10 for \$3.50.

Purple Leaf Beech. The blood-leaved tree possesses all the qualifications of an ordinary beech, and in addition has beautiful red leaves.

Price of Purple Beech trees, three feet high, 50 cents each, 10 for \$4.50.

Catalpa, Bungei. (Umbrella Catalpa.) Grafted on stems 6 to 8 feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves, large, glossy, heart-shaped, deep green; lie like shingles on a roof; always making a symmetrical head. One of the most unique trees; desirable for lawn, park and cemetery planting.

Price of Trees 6 to 8 feet, 75 each, 10 for \$7.00.

Catalpa, Speciosa. One of the most rapid growers. Valuable for timber, fence posts, railroad ties, etc., possessing wonderful durability. Large, heart-shaped, downy leaves, and compound panicles of white flowers, tinged with violet and dotted with purple and yellow. Very ornamental and useful. Price for first class Trees 6 to 8 feet, 30 cents each, 10 for \$2.50.

MALONEY BROS. & WELLS CO., Dansville, N. Y.

Gentlemen: Your rose bushes arrived in fine condition and I was greatly pleased with them. They were packed in good shape and every one will grow all right.

Respectfully,
 J. H. WHITE.

Hardy Flowering Shrubs

Price of all Varieties of Shrubs

		EACH	TEN	HUNDRED
Large size	2 year	.16	\$1.50	\$12.50

A BUSH OF SPIREA VAN HOUTTEI IN FULL BLOOM

Althea. A large shrub, sometimes trimmed into tree form, that blooms freely in August or September, when almost every tree is out of bloom. Vigorous grower and succeeds everywhere. Also called Rose of Sharon. We can furnish double varieties in these colors: Althea Double Purple, Red, Pink and White.

Deutzia, Grenata, Double-Flowering. A hardy, vigorous shrub that does not suffer from insects or diseases and early in the season is fairly covered with very showy double white flowers that on the edge are slightly tinged with rose. Handsome, desirable shrub.

Deutzia, Gracilis. Pure white flowers in June. Two feet high when fully grown.

Deutzia, Lemoinei. Dwarf, the flowers are large, pure white and produced freely.

Deutzia, Pride of Rochester. Blooms in May. Double, white, tinted with rose on the edge.

Golden-Leaved Elder. The best of all the colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold.

Weigela, Candida. The flowers are of the purest white, blooming in June, and all summer. Hardy.

Weigela, Eva Rathke. With showy, bright red flowers borne freely during the summer.

Weigela, Floribunda. The flowers are dark crimson, with white stamens somewhat like Fuchsia flowers. It blooms in the spring and in the fall.

Weigela Rosea. This is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large and of deep rosy color, and are borne in great profusion.

Lilac, Purple. An old favorite; purple flowers.

Calycanthus (Sweet-scented shrub). The wood is fragrant; foliage rich; flowers are of chocolate color, having a peculiarly agreeable odor.

Spiraea, Billardi. A hardy, free growing shrub. During July every branch and twig is tipped with a spike of beautiful blood-red flowers 4 to 6 inches in length. A distinctive and beautiful flower and shrub.

Spiraea Callosa Alba. A white flowering variety, of dwarf habit; very fine.

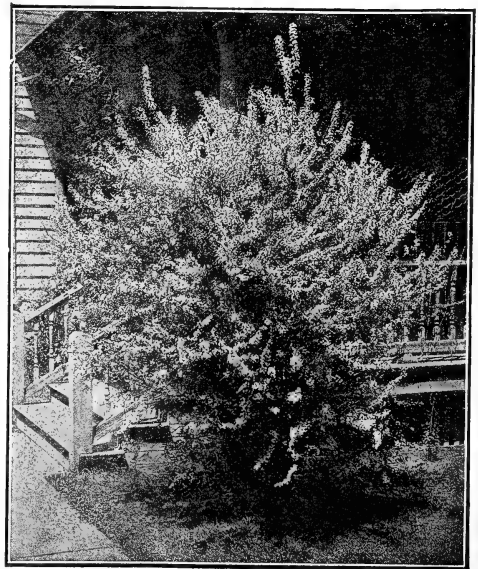

Spiraea Douglasi. Has spikes of beautiful, deep rose-colored flowers in July and Aug.

Spiraea Callosa Rosea. Has large panicles of deep rosy blossoms; grows freely and blooms nearly all summer; fine.

Spiraea Van Houttei. This is undoubtedly the best of the spiraeas. The cut shown is a fair one and shows it in full blossom. The blossoms are white. Do not pass it by.

Fringe Purple or Smoke Tree. A very elegant and ornamental large shrub, with curious, hair-like flowers of a pinkish brown color which sometimes literally cover the tree and remain all summer.

Lilac, White. A well known favorite.

DEUTZIA, PRIDE OF ROCHESTER

DANSVILLE'S PIONEER WHOLESALE NURSERIES

THE BUSH HYDRANGEA (*Paniculata Grandiflora*)

White Fringe. A popular and much admired shrub of moderate growth, and rounded form, with large, dark green, glossy leaves, and long drooping panicles of beautiful white fringe-like flowers.

Forsythia Fortunei (Golden Bells). Deep yellow flowers in great profusion in April.

Hydrangea, Paniculata Grandiflora. Absolutely hardy; thrives in all soils; grows rapidly and blossoms profusely. The flowers are pure white, afterward changing to pink, and are borne in large pyramidal trusses often more than a foot long and six to eight inches in diameter. Begins to bloom early in August, and continues to bloom for several weeks. Wherever known it is considered to be one of the finest flowering shrubs.

Upright Honey Suckle (white.) Pure white flowers followed by deep red berries that fill the bush till autumn; very attractive.

Upright Honey Suckle (pink). Pink flowers which contrast beautifully with the foliage.

Mock Orange. Flowers white, deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower.

Japan Barberry Thumbergii. One of the most hardy and valuable species; foliage tinted in autumn.

Common Barberry. Clusters of red berries.

Purple Barberry. Similar to Common Barberry only that the foliage is purple.

Snowball, Common. A popular shrub. Makes a large bush. Bears balls of pure white flowers in June.

Hedge Plants

California Privet. A vigorous-growing variety, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge-plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up many strong shoots. The leaves are a rich green, and will remain on the plants up to Christmas, and if they are a little sheltered they will keep green almost all winter. This is especially the case if the hedge has attained some age and has frequently been trimmed. Though it is a very strong grower, it can be kept to a low size by frequent trimming. Where a close, compact hedge is desired we recommend California Privet. Should be planted about eight to ten inches apart to give best results.

Strong plants, well branched, 18 to 24 inches
Strong plants, well branched, 24 to 30 inches

EACH	TEN	HUNDRED	THOUSAND
.05	.45	\$3.00	\$25.00
.08	.65	4.00	35.00

Barberry Thumbergii. A pretty plant of dwarf habit from Japan. Very graceful and its foliage turns to a beautiful red in the fall. All Barberries make very fine hedges.

Strong plants, 18 to 24 inches, well branched, 16 cents each; \$1.50 per 10; \$14.00 per 100.

Norway Spruce. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed with great beauty at all seasons of the year, but particularly in winter when its branches are weighed down with newly fallen snow. This spruce is a rapid grower and is often used as a lawn fence between village or city lots. Norway Spruce can be planted most effectively in groups on the lawn, imitating nature, planting without any particular order, but far enough apart to give each tree an opportunity to expand itself in its beauty.

GENERAL JACQUEMINOT

General Jacqueminot. Brilliant crimson; large and fine. Beautiful in bud and a universal favorite.

Baby Rambler. A dwarf (bush) form of Crimson Rambler, and furthermore, Everblooming. Will bloom continuously throughout the summer if planted out-of-doors.

La France. Rich satiny peach, changing to deep rose; large and full. A constant bloomer. The sweetest of all.

Magna Charta. Pink and carmine; very large and full; a profuse bloomer. Fragrant. Free grower.

Paul Neyron. The largest of all. Deep rose color. A free bloomer and vigorous grower.

Mad. Plantier. Pure white, large and very double. A free bloomer and grower.

Prince Camile de Rohan. Very dark velvety crimson, changing to intense maroon.

Climbing Roses

Crimson Rambler. New. Of Japan origin. Very vigorous, growing eight to ten feet a season after it is well established. Entirely hardy and extremely prolific. It blooms in clusters. Of a beautiful crimson color and lasts a long time. It is a jewel.

Baltimore Belle. Pale blush, nearly white. Bloom in clusters.

Prairie Queen. Bright, rosy red. Very large and fine.

Dorothy Perkins. A most valuable Pink Rambler Rose. Of a most beautiful shell-pink color. In hardiness, nothing more could be desired. Flowers are very double of large size, usually two inches across and borne in loose clusters.

Margaret Dickson. New, perfectly hardy and very vigorous. A free summer and autumn bloomer. Flowers white with pale flesh center, of a waxy texture and delightful fragrance.

Clio. New. The perfection in Hybrid Perpetuals. Of delicate satin blush with a little deeper center. Large, well shaped and very double. Strong, robust, hardy and prolific. A jewel.

Blanche Robert. Pure white, large and full, buds very beautiful. A strong grower and a desirable variety.

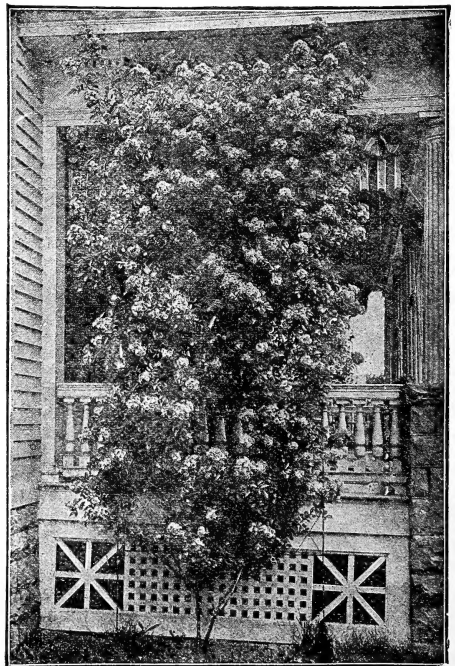

Marshall P. Wilder. Bright cherry carmine; very fragrant and one of the freest bloomers; vigorous.

Baron de Bonstetten. Flowers large and very double; color rich, dark red, passing to deep velvety maroon. Very fragrant.

Coquette des Alps. White, slightly shaded with carmine; strong grower and a great favorite. This variety is very valuable; it continues to give a profusion of blossoms for weeks after general varieties have finished.

Frau Karl Druschki (Snow Queen). A new rose of great merit. There is nothing in white roses quite as fine as this. Pure white large and of elegant form.

Mrs. Laing. Very free flowering; commences early and continues to bloom profusely until fall. Of delicate pink color. Very fragrant

Everybody Should Take Advantage of These Special Offers

MALONEY BROS. & WELLS CO. NURSERIES

The large photograph represents our new and modern packing plant. The small one shows our packing house used in 1882.

Quality Trees and Honest Treatment account for our wonderful growth.
